

Dear customer,

We would like to inform You, that recently there has been fraud attempts in Armenia connected with international transfers, which are being implemented the following way:

The hackers send false emails on behalf of the business partners, where they mention that the payments should be done using the new falsified bank details.

Thus, we advise You to be more careful and attentive:

In case Your partner gives You new bank details to make international transfers, connect with the latter via the phone numbers that You previously had, make sure the changes have really taken place and then make the transaction.
